

OMSTRAP

CS MH 1 A MINI

Semi-automatic taping machine that seals the upper and lower parts of American type boxes with self-adhesive tape, in fixed format batches, with quick and easy manual adjustment. The machine can be used by unskilled staff and, when combined with infeed and outfeed roller conveyors, forms a simple and economical packaging station.

The cardboard boxes are dragged by 2 lower side haul-off belts controlled by a single motor; adjustments for the different formats are made by handwheels

manually adjustable format

width from 95 to 300 mm (A)

height from 70 to 500 mm (C)

minimum length 185 mm (B)

The cardboard boxes are dragged by side machine belts

with taping heads for 50 mm wide adhesive tape

voltage V.220 single-phase Hz.50, installed power Kw.0.40

box transfer speed 20 metres/minute

average production 1000 boxes/hour

machine weight 140 kg

adjustable work table height from 650 to 750 mm without wheels

RAL colour blue 5013 grey 9006

OPTIONAL

Wheels

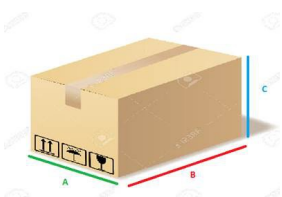

Loading roller conveyor

380 three-phase

4 wheels, table height is now from 750 to 820 mm

Front and rear 440 mm

Voltage V.380 + N three-phase Hz.50, installed power Kw.0.40
